Work Experience

Applied AI Engineer
 Mar 2026 – Present • Full-time

OpenAI
 San Francisco, CA

- Partner with technology companies to bring generative AI applications from prototype to production using the OpenAI API
- Shape customer use-case prioritization, evaluation design, solution architecture, model selection, and API integration
- Translate customer deployment insights into product feedback and roadmap recommendations for internal product and research teams

Applied Machine Learning Engineer
 Jun 2025 – Mar 2026 • Full-time

Fireworks AI
 San Mateo, CA

- Optimized LLM/VLM workloads end-to-end, from fine-tuning and evals through serving configuration and deployment, across production RAG, agent, and multimodal use cases for 6+ enterprise customers
- Onboarded 5+ open models on Fireworks AI, including its first omni model, enabling a production multimodal deployment for a healthcare customer
- Drove adoption of Fireworks AI by creating 10+ pieces of technical content, including tutorials, demo applications, and API documentation, improving the onboarding experience for new developers

Senior ML Engineer → GenAI Lead
 Mar 2023 – Apr 2025 • Full-time

Superlinear
 Brussels, Belgium

- Led a team of 8 GenAI-focused machine learning engineers supporting a project portfolio valued at €1M+ in yearly revenue
- Coordinated the development and deployment of a pharma client’s first GenAI app, unlocking €50k+ of yearly savings via automatic translation and PII detection
- Generated €250k+ revenue via technical presales, including solution architecture design, proposal crafting, and presentations to key stakeholders

Senior Data Scientist (AI & ML)
 Feb 2022 – Mar 2023 • Full-time

JPMorgan Chase
 New York, NY

- Engineered 100+ features and trained ML models to predict fraudulent customer authentication events, balancing customer service experience with fraud risk
- Coordinated the Explainable AI track for the inaugural 2022 JPMorgan Chase AI Summit, which brought together 10+ speakers and 100+ attendees

Graduate Research Assistant (AI & ML)
 Sep 2020 – Dec 2021 • Part-time

Georgia Tech Research Institute
 Atlanta, GA

- Implemented neural natural language processing models (RoBERTa) to automate COVID-19 outbreak detection using web-scraped news article contents
- Published a paper as first author in the Springer Lecture Notes in Artificial Intelligence as part of the 2021 Artificial Intelligence in Medicine Conference

Research Assistant (AI & ML)
 Aug 2018 – Jul 2020 • Part-time

Neural Data Science Lab
 Atlanta, GA

- Engineered a novel multi-task convolutional neural network architecture for joint microstructure segmentation and brain area classification of mouse brain x-ray data
- Presented a joint poster at the Allen Institute Biolmage Informatics 2019 Conference (funded with PURA Travel Award)

Papers

-  Using Event-Based Web-Scraping Methods and Bidirectional Transformers to Characterize COVID-19 Outbreaks in Food Production and Retail Settings
-  Multi-Scale Modeling of Neural Structure in X-Ray Imagery
-  Bayesian optimization for modular black-box systems with switching costs
-  A three-dimensional thalamocortical dataset for characterizing brain heterogeneity
-  Multi-task learning for neural image classification and segmentation using a 3D/2D contextual U-Net model

Skills

 **Areas of Expertise**

LLMs

NLP

RAG

Agents

Fine-tuning

Computer Vision

Team Leadership

 **Programming**

Python

Go

PyTorch

SQL

Java

 **AI & ML**

Hugging Face

LlamaIndex

vLLM

Unsloth

Ragas

LangChain

Azure AI Search

 **Visualization**

Matplotlib

Plotly

Streamlit

Tableau

 **DevOps & Cloud**

Kubernetes

Docker

Azure

GCP

AWS

Git

APIs

CI/CD

Terraform

Education

MS in Computer Science (GPA: 3.90 / 4.00)
Georgia Institute of Technology
 Aug 2020 – Dec 2021  Atlanta, GA

BS in Computer Science (GPA: 3.92 / 4.00)
Georgia Institute of Technology
 May 2018 – May 2020  Atlanta, GA

BS in Neuroscience (GPA: 3.95 / 4.00)
University of Miami
 Aug 2012 – May 2016  Coral Gables, FL
